Miller Weldmaster Adds Grommet Feature to the 112 Extreme™ Fabric Welder

NAVARRE, OH January 22, 2011 - The 112 Extreme™ is the “go to” fabric welder for pre-printed or printed media by sign companies all over the world. The 112 Extreme™ is designed for the Grand and Large format printer and will produce the fastest seams in the industry! The dual vacuum and high speed welding system ensures perfect print alignment at a pace to keep ahead of your printing.

The Easy Slide Grommet option eliminates multiple finishing stations, reduces finishing times, keeps your graphics off the floor and is an easy one-person operation.

“The 112 Extreme™ is the most versatile welding machine for grand format printers”, said Truy Pham, National Sales Manager, “It really answers the question, You printed it, now what?”

The 112 Extreme™ is designed to weld high-speed hems, rope-in-hems, pockets, overlaps and backlit seams. Along with welding various industrial fabrics, this is the ideal welder for the grand format recyclable polyethylene outdoor signs. To properly weld the seams and attaching hardware for the OOH (Out Of Home) advertising segment, the 112 Extreme™ will keep you competitive.
