Miller Weldmaster Heat-Sealing Equipment For the Production of In-atable Products

Miller Weldmaster manufactures a variety of equipment for the production of in-atable products. Miller will design a machine to fit your specific in-atable production needs. Visit www.weldmaster.com and pick your industry for more In-atable production equipment, and watch videos of these systems.

T-300 Extreme Curve

T-300 Extreme Curve For the Manufacturing of In-atable products

The T-300 Extreme Curve is designed to weld all the seams needed to produce your in-atable products!

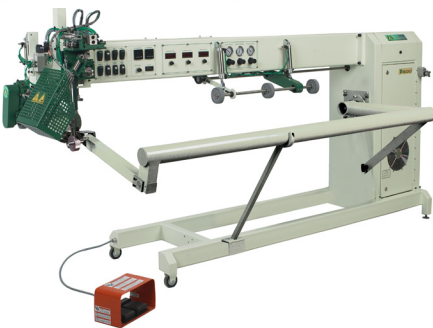

The T-300 Extreme Curve combines versatility and precisely controlled operating parameters with an ergonomic design and interface for easy operation, speed, accuracy and productivity.

The T-300 Extreme Curve will easily allow you to seam curves and irregular shaped panels needed for producing in-atable products.

T-300 Extreme Curve Seal Types:

T-500

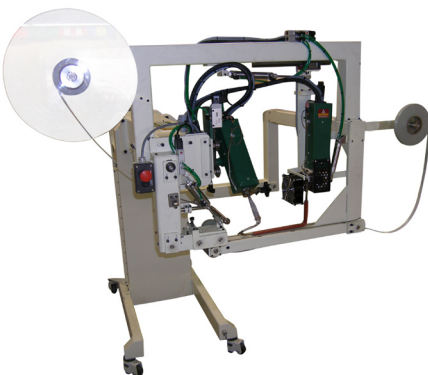

T-500 with Swing Arm For the Manufacturing of In-atable products

The T-500 is designed to weld all the seams needed to produce your in-atable products!

The T-500 with swing arm will easily allow you to seam curves and irregular shaped panels needed for producing in-atable products. With its longer throat the T-500 will increase your production while decreasing fabric handling.

T-500 Seal Types:

T-100 Custom In-atable For the Manufacturing of In-atable products

The T-100 Custom in-atable is designed to weld an overlap with cover strips on top and bottom!

The T-100 Custom In-atable will easily allow you to seam curves and irregular shaped panels needed for producing in-atable products. This custom machine is designed to weld an overlap seam with a cover strip on top and bottom of the seam to prevent water wicking.

T-100 Custom In-atable Seal Types:

Lap Seal
